PROFILE

I am a Year 3 student passionate about turning ideas into impactful, user-centric solutions. Through hackathons and projects, I have developed a strong foundation in analysing data, identifying user pain points, and iterating on products to enhance usability and engagement. I thrive in collaborating with cross-functional teams, taking ownership of challenges, and bridging the gap between business goals and user needs. With a keen eye for detail and a drive for innovation, I am eager to build intuitive, data-driven products that solve real problems and deliver meaningful value.
